Practical Digital Marketing and AI Psychology explores how successful brands utilise both psychology and cutting edge artificial intelligence technologies to maximise digital marketing strategies. Psychology has long been a foundation for successful marketing strategies and evolving AI technologies are opening up new opportunities for marketers to help brands build trust and loyalty online. In this exceptional book, award-winning writer Jonathan Gabay delves into fascinating psychological digital marketing techniques and concepts explaining the practical psychology and science you need to lift your marketing career to the next level. Gabay explores how new technologies can be harnessed to increase their impact significantly. The book provides practical tips and contemporary best practice examples including prompt engineering, the psychology behind mission statements and logo design, gamification, the possibilities and pitfalls of social media among many more areas that will ensure your brand is trusted, valued and desired. This definitive book is perfect for marketing students up to PhD level and digital marketing PR and sales professionals looking for a fascinating, compelling read packed with ideas and examples that combines academic excellence with practical advice, all written and presented in a highly accessible style.

Hayes Principles and Methods of Toxicology has long been established as a reliable and informative reference for the concepts, methodologies and assessments integral to toxicology. The new edition contains updated and new chapters with the addition of new authors while maintaining the same high standards that have made this book a benchmark resource in the field. Key features: the comprehensive yet concise coverage of various aspects of fundamental and applied toxicology makes this book a valuable resource for educators, students and professionals; questions provided at the end of each chapter allow readers to test their knowledge and understanding of the material covered; all chapters have been updated and over 60 new authors have been added to reflect the dynamic nature of toxicological sciences; new topics in this edition include safety assessment of cosmetics and personal care products, the importance of the dose-rate response, novel approaches and alternative models, epigenetic toxicology and an expanded glossary. The volume is divided into 4 major sections addressing fundamental principles of toxicology: Section I: Principles of Toxicology; Major classes of

established chemical hazards section ii agents current methods used for the assessment of various endpoints indicative of chemical toxicity section iii methods as well as toxicology of specific target systems and organs section iv organ and system specific toxicology this volume will be a valuable tool for the audience that wishes to broaden their understanding of hazards and mechanisms of toxicity and to stay on top of the emerging methods and concepts of the rapidly advancing field of toxicology and risk assessment
