the bestselling author of *Einstein's Dreams* explores the emotional and philosophical questions raised by recent discoveries in science with passion and curiosity he looks at the dialogue between science and religion the conflict between our human desire for permanence and the impermanence of nature the possibility that our universe is simply an accident the manner in which modern technology has separated us from direct experience of the world and our resistance to the view that our bodies and minds can be explained by scientific logic and laws behind all of these considerations is the suggestion at once haunting and exhilarating that what

we see and understand of the world is only a tiny piece of the extraordinary perhaps unfathomable whole

this book is a survey of the range of apparently miraculous accidents of nature that have enabled the universe to evolve its familiar structures atoms stars galaxies and life itself concludes with an investigation of the so called anthropic principle

a short monograph examining the role of chance and accident in the creation and realization of the self and the social

given the excellent historical context in which corey frames his case and the rational manner in which he closes off the loopholes the stage is set for paradigm shift in the secular area i highly recommend this book hugh ross astronomer

something old something new contemporary entanglements of religion and secularity offers a fresh perspective on debates surrounding religious and secular thinking in each chapter wayne glausser focuses on a topic of contemporary relevance in which something old the sacrament of extreme unction greek rhetorical tropes scholastic theology entangles with something new psilocybin therapy for the dying the new atheism cognitive science glausser uses the term entanglement to describe his distinctive approach to the relationship between religion and secularity the concept of entanglement refers to a contentious but oddly intimate relationship in which secular ideas compete with corresponding religious convictions but neither side wins by displacing the other as traditional religious knowledge and values come into conflict with their secular counterparts the old ideas undergo stress and adaptation but the influence works in both directions whether they do so consciously or unconsciously entangled secularists engage with and sometimes borrow from older paradigms they believe they have surpassed something old something new takes an unusual approach to this popular debate and offers a new perspective in the conversation between believers and secularists this is a book that theists atheists agnostics and everyone still searching for the right label will find respectful but provocative

volume two outlines in thorough but understandable fashion other scientific evidence for recent special creation with no reference to scripture
